# AssetFactor®

Asset Tracking and Management Made Simple.

AssetFactor is a mobile/web asset management application that can be customized to your business and deployed in hours; not days or weeks. AssetFactor automates basic asset management functions such as check-in / check-out, audit, maintenance forms, and more. AssetFactor uses your computer or phone's camera as a barcode scanner so you don't need to buy additional hardware. With AssetFactor you will gain centralized, mobile visibility of all your assets: where they are, who has them and their maintenance status.
